

Please don not allow cell phones to be used on Airplanes while they are flying. As a passenger, due to safety reasons, I can't get away from people who would choose to talk on their cellphone. I can't get up to stand some place else and on most flights would not be able to change my seat.

On public transportation you have a choice to get away from people who engage in activity that you don't want to be listen too. You can get off, go to another car on the subway or train, find another seat. You don't have those choices on an airplane.

Cell phones are invasive of other peoples space and the space on planes is already too small and restrictive.
